NEW BOOKS

BASIC INTERNAL AUDITING PRINCIPLES AND TECHNIQUES BY J.B. Thurston. Scranton, International Textbook Company, 1949. 94 p. 325 T42 1949.

A comprehensive approach for practical internal auditing. Designed to give the reader an understanding of the importance of modern internal auditing, and the basic principles and procedures involved.

THE CONSERVATION YEARBOOK. 1952. Washington. 225 C766.

A directory of facts and figures in fields of wildlife and range management, reclamation, forests and forest products, and soil and water conservation. A valuable reference for those who work in conservation.

INSECTS, THE YEARBOOK OF AGRICULTURE, 1952. Washington, 1952. 780 p. 1 Ag84Y.

"No short review of the current USDA Yearbook, Insects, can do it full justice. It is a publication which belongs in the hands of many people, and it surely compares favorably in many ways with the fine standard of quality set in earlier yearbooks. ... There are many interesting items of information ... and many choice articles- Teal's essay on "Oddities of the Insect World" and Carpenter's "Fossil Insects" - these and many others combine to make a readable and important reference book." --What's New In Crops and Soil, October 1952.

THE NATURE AND PROPERTIES OF SOILS; A COLLEGE TEXT OF EDAPHOLOGY by T. Lyttleton Lyon and others. 5th ed. rev. New York, Macmillan, 1952. 591 p. 56 L99N.

"A comparison of the status of soil science today with that of a decade ago. The aim of this new edition has been to digest and evaluate the flood of new information and incorporate it in a simpler form than the preceding edition." - Preface.

OUR GARDEN SOILS by C.E. Kellog. New York, Macmillan, 1952. 232 p. 56.34 K29

Your garden, a window box or a thousand-acre farm can only be as good as the soil. This book makes the complex knowledge of soil science available to you for solving the problem of your own garden.

The appendix contains a discussion of soil maps, lists of soil preferences for each group of commonly grown plants, planting suggestions and yields.

MODERN GARDENING, A COMPLETE GUIDE TO THE AGRICULTURAL USES OF MODERN CHEMISTRY'S
MIRACLE DRUGS. by P.P. Pirone. New York, Simon and Schuster, 1952.
371 p. 395 P66.

A complete guide to the miracle drugs modern chemistry development for the commercial farmer and for the back-yard gardner. This is the case for modern science in the old debate over what makes a good garden grow.

REPORTING AGRICULTURE THROUGH NEWSPAPERS, MAGAZINES, RADIO, TELEVISION by
W.B. Ward. Ithaca, N.Y., Comstock, 1952. 362 p. 238 T21r.

"This book is a sort of primer that may be valuable to two kinds of persons: those who are anxious to enter one of the fields of agricultural journalism, and those who want to progress faster. This work describes opportunities open to you and presents principles and techniques. It deals mainly with the present." --Preface.

SOILS, THEIR ORIGIN, CONSTITUTION AND CLASSIFICATION; AN INTRODUCTION TO PEDOLOGY
by G.W. Robinson. 3d ed., rev. and enl. London, Murby, 1949. 573 p.
56.1 R55 Ed.3.

The contents of this book deals with: Origin and properties of soils, description, classification, soil surveys and soil analysis and the inter-relationships of soils, plant growth and agriculture.

STABILITY AS A FACTOR IN EFFICIENT FOREST MANAGEMENT by A. Koroleff. Montreal,
Pulp and Paper Research Institute of Canada, 1951.

"This study is no blueprint of planning woods operations. The text is divided into three chapters: forest labor, forest management, and the writer's general conclusions with regard to required planning." Introduction

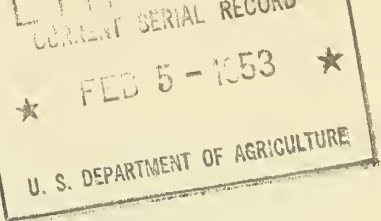

STANDARDIZED AUDIT WORKING PAPERS by F. Staples. Thionville, Wis., The Countin
House Publishing Company, 1949. 279 p. 325 St22.

Perhaps the most unique feature of this book is the complete set of audit working papers illustrating in detail the working papers completed on assignment. It illustrates wide experience in audit procedure rather than theory. Book Jacket.

UNDERSTANDING HEREDITY; AN INTRODUCTION TO GENETICS. New York, Wiley 1952.
238 p. 403 G57U.

At one time or another everyone wonders about heredity. The nurseryman in relation to his plants, the physician in relation to his patients, the farmer in relation to his seed and crops, and the layman in relation to himself and his fellow man. The science of genetics has now pinned down the facts that give us a clear solution to what once was the fascinating puzzle of heredity. The author puts into this book the facts of heredity in compact form, facts necessary for a true insight into much of the living world in general.
